Tom Swift and His Aerial Warship *Victor Appleton*

Tom Swift and His Aerial Warship – #18 in the Tom Swift Jr. Series

Tom Swift is an inventor, and these are his adventures. The locale
is the little town of Shopton in upstate New York, near Lake Carlopa.
While some of Tom's inventions are not well–founded in a scientific
sense, others elaborated developments in the news and in popular
magazines aimed at young science and invention enthusiasts.
Presenting themselves as a forecast of future possibilities, they now
and then hit close to the mark. Some predicted inventions that came
true include "photo telephones", vertical takeoff aircraft, aerial
warships, giant cannons, and "wizard" cameras. However some other
devices, such as magnetic silencers for motors, have not appeared yet.
–adapted from Wikipedia by Karen Merline
